

MARIUS NGABOYAMAHINA

Engineering Leader • Forward Deployed Engineer • Financial Systems & AI Solutions

Accra, Ghana • +233 598 101 745 • ngabomarius@gmail.com • linkedin.com/in/ntezi • github.com/Ntezi • ntezi.github.io

PROFESSIONAL PROFILE

Senior Software & Forward Deployed Engineer with **over a decade of international experience** translating complex business challenges into reliable backend and full-stack solutions that address practical business needs. Proven track record in architecting highly available financial platforms, secure payment integrations, and distributed systems. Combines data engineering pipelines with **production-grade AI solutions built on Palantir Foundry**. A collaborative technical leader passionate about mentoring engineers and sharing knowledge, bringing hands-on engineering judgment and client-facing delivery experience across Africa, Europe, Japan, and the United States.

PROFESSIONAL EXPERIENCE

Digital Factory Manager | UMWALIMU SACCO

Jun 2023 – Present

Headquarters: Kigali, Rwanda • Working remotely from Accra, Ghana • **Permanent employment**

- Lead the digital factory team responsible for the design, delivery, integration, and production operation of digital banking and business solutions.
- Introduced Go for SMPP integration and Kafka for account-validation workflows and other event-driven processing.
- Led the eKash integration with the Rwanda National Digital Payment System (RNDPS) using ISO 20022, and led PostBridge interface integration using ISO 8583 for interoperability and ATM access respectfully
- Directed integrations spanning MTN Escrow liquidation and deposits, school-fees collection, Dusangire Lunch school-feeding collections.
- Led online loan application delivery, Agency Banking and automated loan provisioning aligned with IFRS 9, improving access and operational consistency.
- Introduced Agile delivery, CI/CD, and containerization practices; mentor engineers in project execution, architecture, and system design.

Technology: C# • ASP.NET Core • Go • Kafka • ISO 20022 • ISO 8583 • SMPP • REST APIs • SQL Server • Redis • Docker • GitHub Actions • CI/CD

CONCURRENT CONSULTING ENGAGEMENTS DURING UMWALIMU SACCO EMPLOYMENT

Forward Deployed Engineer — Consultant | Hence Technologies Ltd.

Jun 2025 – Present

London, UK • Remote from Accra, Ghana • **Concurrent consultancy**

- Implementing production-grade AI and data solutions by translating complex client requirements into deployable workflows, integrations, and maintainable product capabilities.
- Deliver full-stack capabilities for Hence Legal's proprietary platform and work directly with stakeholders across the United States, Europe, and Africa.

CLIENT DEPLOYMENTS THROUGH HENCE

Foward Deployed Engineer — Unruly Deployment | The Unruly Corporation

Remote from Accra, Ghana • **Hence client deployment**

- Built and maintained data and AI workflows on Palantir Foundry while learning the platform.
- Led root-cause investigations, solution design, implementation planning, and code reviews across Foundry pipelines and the shared data model, prioritizing reversible changes and production safety.
- Conducted a Palantir Foundry stack migration, aligning frontend and backend runtime endpoints, OSDK SDK and dependencies, OAuth client configuration, and ontology-backed application wiring.

Technology: Palantir Foundry • OSDK • OAuth • TypeScript • React • Data Integration • Workflow Automation • Production AI

Senior Software Developer Lead — Consultant | Credit Jambo Ltd.

Nov 2025 – Jun 2026

Musanze, Rwanda • Remote from Accra, Ghana • **Concurrent fixed-term consultancy**

- Led technical delivery for the Jambo360 digital-finance platform, guiding the engineering team's day-to-day execution in close collaboration with the CTO.
- Steered architecture and design decisions, introduced structured code reviews and engineering standards, and coordinated planning against delivery milestones.

Technology: Node.js • TypeScript • React • Tailwind CSS • React Native • PostgreSQL • Docker • Microservices

WIREDIN EMPLOYMENT & PARTNER DEPLOYMENTS

Senior Software Developer — Team Lead | **WiredIn Ltd.**

Feb 2020 – Jun 2023

Kigali, Rwanda • Client delivery across Rwanda, Europe, Japan, and the United States • **Primary employment**

- Led delivery across a portfolio of partner and client engagements while mentoring junior engineers and supporting requirements analysis, architecture, implementation, and quality.
- Monitored projects across distributed teams, identifying and resolving design, business-logic, and code-quality issues.

Technology: PHP • Yii2 • Java • Spring Boot • Node.js • React • React Native • Android • AWS • Redis • PostgreSQL • MySQL • Docker

CLIENT DEPLOYMENTS THROUGH WIREDIN

Software Engineer — Audacy Deployment | **Audacy, Inc. /**

Sep 2020 – Oct 2021

Cardinal Peak partnership

United States • Remote • **WiredIn client deployment**

- Contributed to software delivery for Audacy as an engineer deployed through the WiredIn–Cardinal Peak partnership.

Technology: Node.js • AWS • PostgreSQL • Redis • Kubernetes • HLS

Software Engineer — AmperWave Deployment | **AmperWave** (acquired by Audacy, Inc.) / Cardinal Peak partnership

Nov 2021 – Sep 2022

United States • Remote • **WiredIn client deployment**

- Designed and implemented microservices supporting live audio streaming and ad-serving workflows; debugged production issues across modern services and legacy systems.
- Worked with Kafka and Confluent in a microservices environment and expanded hands-on AWS experience including MSK, MQ, SQS, and EKS.

Technology: PHP • React.js • Kafka • Confluent • HLS • Microservices • AWS • Redis • PostgreSQL • MySQL • Docker • Kubernetes

Software Engineer — EnergiePartners Deployment |

Feb 2020 – Aug 2020; Oct 2022 – Jun 2023

EnergiePartners

Netherlands • Remote • **WiredIn client deployment**

- Delivered software engineering work for EnergiePartners across two assignments while employed by WiredIn, collaborating with distributed product and engineering stakeholders.

Technology: Java • Android • Python • Django

ADDITIONAL WIREDIN-ERA ENGAGEMENTS

Programming Trainer | **WiredIn Academy**

Nov 2022 – Jun 2023

Kigali, Rwanda • **Part-time alongside primary role**

- Taught programming fundamentals with Python and used pair programming and real-world exercises to develop practical software-engineering skills.

Technical Mentor — Consultant | **African Leadership** **International Ltd. (African Leadership University / The** **Room)**

Nov 2022

Cybercity, Mauritius • Remote • **Concurrent consultancy**

- Conducted technical and behavioral mock interviews and reviewed participant CVs for the Tech Career Catalyst program.

Software Engineer Consultant | **Algorithm Inc.**

Feb 2020 – Mar 2023

Kigali, Rwanda • **Concurrent consultancy**

- Provided database administration, data engineering, ETL, migrations, backup automation, performance monitoring, and technical advisory support.
- Supported healthcare-provider connectivity, RRA-integrated VSDC/POS/ERP solutions, Ghana EBM export preparation, and the Ishyiga Data Warehouse.

Technology: PHP • Java • Python • MySQL • Apache Derby • AWS • ETL • Amazon S3

Software Engineer Professional Intern | **Rexvirt** **Communications Inc.**

Sep 2019 – Jan 2020

Tokyo, Japan • **WiredIn partner placement** • **ABE Initiative internship**

- Completed the professional internship component of the African Business Education (ABE) Initiative Master's Degree and Internship Program through Rexvirt Communications, a WiredIn partner with links to the WiredIn Tokyo branch.
- Built an IoT solution spanning web and mobile applications, REST APIs, Arduino-based hardware, PCB design, and 3D-printed enclosure design.

EARLIER EXPERIENCE

Software Developer | WiredIn Ltd.

Oct 2015 – Aug 2017

Kigali, Rwanda • Collaboration with teams in Japan

- Worked as a bridge engineer across multiple projects, primarily for Japanese clients, translating requirements and coordinating communication between clients and distributed delivery teams.
- Developed backend and mobile solutions while coordinating implementation, quality assurance, client feedback, and delivery across Rwanda and Japan.

Technology: PHP • Yii2 • Ionic 2 • Angular • AWS • Redis • PostgreSQL • MySQL • Docker

Software Support Manager | Algorithm Inc.

Jan 2015 – Sep 2015

Kigali, Rwanda

- Led a team of ten support specialists deployed across different client organizations, coordinating assignments, issue escalation, service quality, and client communication.
- Automated support workflows and built a bug-reporting tool to improve issue capture, routing, tracking, and resolution.
- Turned user feedback and support findings into product improvements, trained employees and users, and led troubleshooting of complex technical issues.

Junior Software Developer | Algorithm Inc.

May 2013 – Dec 2014

Kigali, Rwanda

- Contributed to Ishyiga inventory-management optimization, including stockout management and purchase forecasting capabilities.
- Supported development, testing, issue documentation, and troubleshooting for business and clinic-management software in collaboration with senior engineers.

EDUCATION

Master of Science in Information Systems | Kobe Institute of Computing, Graduate School of Information Technology

Oct 2017 – Sep 2019

Kobe, Japan

Relevant study: advanced networks, cloud software development, project management, and systems architecture.

Bachelor of Science in Computer Engineering | University of Rwanda, College of Science and Technology (Former Kigali Institute of Science and Technology)

Jan 2010 – Sep 2013

Kigali, Rwanda

TECHNICAL EXPERTISE

Core	Software architecture • Engineering leadership • Backend engineering • API design • Microservices • Financial systems • Data integration • Requirements analysis • CI/CD
Languages & platforms	C# • Go • TypeScript • JavaScript • Java • Python • PHP • ASP.NET Core • Node.js • React • Palantir Foundry • OSDK
Data & infrastructure	SQL Server • PostgreSQL • MySQL • Kafka • Confluent • Redis • RabbitMQ • Docker • Kubernetes • AWS • GitHub Actions • ISO 20022 • ISO 8583 • SMPP
